STRAPALL™ Strapping makes recreational/sportsman wrapping jobs a breeze! You'll use it on camping, hiking, to stabilize light loads, bicycling, fishing, hunting, RV applications, emergency situation and more. Anytime you need to hold something together in a application, you need **STRAPALL™**. The uses are only limited by the imagination! **STRAPALL™** Strapping is strong, durable and weather resistant.

Here is some suggestion on how to best use **STRAPALL™**

- **Overlap** at least eight inches or more when possible.
- **Press** the two surfaces of **STRAPALL™** together firmly where they overlap to ensure full engagement strength.
- For sensitive surfaces such as plants, skin or painted items, face the cloth side of **STRAPALL™** toward the object you're securing.
- Do not use **STRAPALL™** to secure an object that may come loose and cause harm. **STRAPALL™** does have limitations in strength and holding ability. (For additional strength use two or more wraps.)
- Place splice in the area where most pressure is applied, when possible.
- Excessive stress on tape will diminish life of tape.

STRAPALL™ quality construction allows you to splice, twist, roll, loop, nail, staple and glue. It's lightweight, and may last for year.

STRAPALL™ MARINE, CONTRACTORS, PHOTOGRAPHIC, RECREATIONAL AUTO, MOTORCYCLE-POWERSPORTS, ATHLETIC, HEAVY DUTY, BICYCLE, AUTO, POWER SPORTS, GOLF, are products of H.A. Milton Corporation Seattle, WA.
